PROFESSIONAL SUMMARY

PLM Engineer with hands-on experience managing engineering product data and automating product-development workflows across 3DEXPERIENCE Cloud, Autodesk Vault, CAD, and ERP-connected systems. Builds Python, C#, and VB.NET tools for BOM, document, and master-data processes; experienced in cross-functional engineering change and process improvement.

EXPERIENCE

Engineer - PLM

May 2025 – Present

Emerson Process Management

Pune, MH

- Developed EBOMs and MBOMs in the DELMIA role of 3DEXPERIENCE Cloud PLM using webservices and automation, improving BOM-processing time and BOM quality.
- Built a C# .NET utility for Autodesk Vault to batch-download released revisions, supporting controlled product-data migration workflows.
- Designed custom-property add-ins for multiple CAD packages to standardize engineering data for internal teams and downstream ERP use.
- Received the Asia Pacific Win Every Day Award for redesigning the Engineering Change Management process through a custom Power Apps solution and database.

Engineering Intern

April 2024 – December 2024

Emerson Process Management

Pune, MH

- Built an AutoCAD customization tool using the AutoCAD API, VB.NET, and C# to standardize more than 10,000 legacy drawing templates, reducing manual effort and errors.
- Implemented logic to resolve inconsistencies in non-uniform CAD files and enforce updated engineering standards.

SELECTED PROJECTS

3DEXPERIENCE Manufacturing-Item Automation | *Python, REST APIs, ENOVIA / DELMIA role* Nov. 2025

- Architected a standalone utility to automatically create Manufacturing Items linked to Engineering Items through out-of-the-box relationships.
- Designed bulk-input processing logic that reduced the estimated manual execution timeline from two weeks to one day.

Automation of Description Standardization | *Python, spaCy, Vault, SolidWorks, ERP*

May 2026 – Present

- Built an engineering-data standardization workflow integrating Python pipelines with Autodesk Vault, SolidWorks, ERP data, and a controlled reference dictionary.
- Developed maintainable rule-based NLP logic to map legacy descriptions to standardized tokens and improve master-data consistency.

Cross-Platform CAD Metadata Configurator | *VB.NET, WinForms, JSON*

Aug. 2025 – Present

- Architected CAD add-ins for SolidWorks, Autodesk Inventor, and AutoCAD; replaced manual property entry with a configurable interface for ERP-integrated fields.

TECHNICAL SKILLS

PLM / Product Data: 3DEXPERIENCE Cloud, ENOVIA, DELMIA role, EBOM, MBOM, M-Items, Engineering Change Management, Autodesk Vault

Engineering Systems: AutoCAD, Autodesk Inventor, SolidWorks, CAD customization, engineering-data standardization, ERP-connected workflows

Development: Python, C#, VB.NET, REST APIs, AutoCAD API, WinForms, JSON

Tools: Postman, Microsoft Power Apps, Power Automate, SharePoint, spaCy, OpenRefine

EDUCATION

BITS Pilani Work Integrated Learning Programme

Pune, MH

M.Tech. Artificial Intelligence and Machine Learning

July 2026 – Present

Savitribai Phule Pune University

Pune, MH

Bachelor of Technology - Mechanical Engineering

Dec. 2021 – June 2024

Maharashtra State Board of Technical Education (MSBTE)

Pune, MH

Technical Diploma in Mechanical Engineering

Aug. 2018 – July 2021
